### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities:

The symbol "τ" should be defined.

### ***Claim Objections***

Claims 2-3 are objected to because of the following informalities:

Claim 2, line 3; Claim 3, line 3, the symbol "τ" should be defined.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jensen (6,323,981).

With respect to claim 1, Jensen discloses a method for determining a quality of an optical communication system. The method comprises: identifying a known signal LME SIDE TONE 18 (fig 1); transmitting 34 (fig 1) and receiving 26 (fig 1) the signal over an optical network 36,44 (fig 1) (column 3, lines 15-30); comparing the received signal to the known signal using optical correlation 22 (fig 1) (column 3, lines 31-50);

and determining a quality of the optical communication system based on the comparison (abstract).

Jensen does not disclose measuring the optical link as claimed. Since it has been known that an optical communication system comprising a plurality of optical links, it would have been obvious to modify Jensen's method to determine the quality of the links in the communication system to transmit data more accurate.

With respect to claim 2-3, Jensen does not disclose the claimed equations. However, it would have been obvious to modify Jensen's method with different correlating methods for different system setups.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu T. Nguyen whose telephone number is (571) 272-2424. The examiner can normally be reached on T-F 7:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Toatley Jr. can be reached on (571) 272-2800 Ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
